1080 Internal Controls Policy

POLICY STATEMENT

It is the policy of AgSouth Farm Credit, ACA ("AgSouth") to maintain an internal audit/review function as a means of providing all levels of management with information to control the operations, to provide the Board of Directors with information necessary to discharge its responsibilities, and to assist management in reaching a conclusion about the overall effectiveness of the system of internal control.

The Association will accomplish these functions through the Audit Committee, Internal Credit Reviewers, Internal Auditor, and Appraisal Reviewer.

PURPOSE AND OBJECTIVES

Internal control is a process for assuring achievement of an organization's objectives in operational [effectiveness](#) and [efficiency](#) , reliable financial reporting, and compliance with laws, regulations, and policies.

The Board of Directors expects management to maintain a system of internal controls designed to provide reasonable assurance that:

- Transactions are executed in accordance with management's general or specific authorization.
- Transactions are recorded as necessary to:
 - Permit preparation of financial statements in conformity with generally accepted accounting principles and the requirements established by the Farm Credit Administration, and
 - Maintain accountability for assets.
- Access to assets is permitted only in accordance with management's authorization.
- The recorded accountability for assets is compared with existing assets at reasonable intervals and appropriate action is taken with respect to any differences.

The concept of "reasonable assurance" for assets recognizes that the cost of internal controls should not exceed the benefits expected to be derived therefrom.
